

Mohsen Parchami

Junior Gameplay Developer / Technical Designer

Unity · C# · Gameplay Systems · Level Design

mohsen.parchami@gmail.com | 073-531 1982 | mohjo13.github.io | linkedin.com/in/mohsen-parchami | Stockholm

EDUCATION

Södertörns University

Game Development,
Game Design and Scripting
2023 – 2026

IUC Yrkeshögskola

HVAC Engineer
2017 – 2019

N. Virginia Community College

Liberal Arts and Computer Science
2006 – 2009

TECHNICAL SKILLS

Unity 6 (URP)	
C#	
Perforce / Git	
Godot (GDScript)	
MonoGame	
Unreal Engine	

AI-TOOLING WORKFLOW

Claude Code
Unity MCP integration
Project docs for AI agents
(CLAUDE.md, coding standards)

DESIGN AREAS

- Gameplay
- Systems Design
- Level Design
- UI/UX
- Narrative Design
- Sound Design

PRACTICES

- SCRUM / Agile
- Playtesting
- Iteration
- GDD
- Unit Testing

LANGUAGES

Swedish (native)
English (fluent)
Farsi (fluent)

GAME DEVELOPMENT PROJECTS

Murmurs of the Mist

25,000+ SOLD ON STEAM

Unity · C# · Perforce · SCRUM · Multidisciplinary Team

Level designer and gameplay scripter in a multidisciplinary SCRUM team. Built a full chase level from blockout to release: character controller, dynamic camera system, custom shaders, lighting, post-processing, sound design and in-game voice acting. Iterated on playtest feedback. 25,000+ copies sold.

Pizza to Hell

IN DEVELOPMENT

Unity 6 (URP) · C# · PSX style · Team Project

Responsible for the combat and combo architecture, built on modular components and central enums. Parry system and enemy AI that responds to it. Custom editor tooling for tuning combat data. Shader-driven streak HUD.

Monopoly

C# · .NET · Console · Unit Tests

Modular C# implementation of Monopoly with a focus on clean architecture and OOP. Turn pipeline covering dice, movement, square resolution, transactions and jail logic. Core systems separated into Board, Players, Managers and AI. AI opponent built with minimax. Full unit test coverage.

Streets of Belonging

Unity · C# · Group Project

Narrative walking game. Built the UI systems, emotion and colour triggers (five NPC emotional states mapped to colour and light), a phone UI mechanic with anchored-position tweening, scene transitions and audio integration. Contributed to the GDD and player experience design.

Cannoneer

MonoGame · C# · Physics Simulation

2D artillery game with projectile physics: velocity from charge level and barrel angle (cos/sin), per-frame gravity for parabolic arcs, charge oscillation and multi-ring explosion animation.

PROFESSIONAL EXPERIENCE

Assistant Engineer

2019 – present

TQI Consult AB

Technical documentation and CAD drawings (MagiCAD) for HVAC and piping projects. Coordinated across teams on fixed deadlines.
